

VMS Management

Cloud Amber's vision is to provide products that enable Traffic Managers to model, monitor and control the environmental effects of travel as well as reducing congestion to maximise the use of a limited road network. Cloud Amber has full support for variable message signs including current and predicted car park spaces, legends, multiple message priorities. The system fully integrates with the Strategy Manager, Journey Times Engine and Real Time Passenger Information Systems.

Key features and benefits:

- **Save capital and revenue for RTPI sign purchases**
- Available through any internet terminal
- Allow full, limited or read only access
- Control VMS signs and other equipment cross boundary
- Fully UTMC compliant
