

# RTPI Data Broker

Cloud Amber's Data Broker enables numerous connections between real time information systems through a single collective data hub, negating the need for endless expensive server to server connections.

It permits cross border buses from multiple neighbouring systems to be predicted on a display or even for an Authority to support and seamlessly link legacy and new real time systems from different suppliers. In addition Authorities may purchase and connect displays from any / many display manufacturers thereby ensuring best value.

Key features and benefits:

- **Guaranteed lower capital and maintenance costs**
- Obviates the need for numerous connections
- Ensures competitive prices for displays and other equipment
- Wider market and product set available for purchase
- Single point of contact for issues
- Fully supports RTIG XML, CEN SIRI & VDV 454
